Client: Easter Developments
Architect: Hamiltons
Engineer: Paul Owen Associates

FEME MERTON

Marbank are currently working with Easter to provide two new build units for end user FEME. The scheme based in Merton, South West London, comprises two warehouses with 10,000 ft² of head office space. Both buildings are portal framed on vibro compacted ground with a mixture of steel cladding and curtain wall glazing to the elevations. BRE are assessing the scheme to provide a BREEAM Very Good rating.
